Note:

- 1.LED Chip:Use super bright chips from Taiwan chip low attenuatin process encapsulate DIP LED.Color temoerature:Warm white(3500K) Pure white(6500K). Cool white(8000K)
- 2.Case material: Use Japanese Emperor benevolence import PC plastic materials, light transmission rate of 88%.
- 3.Price Description: Above quotation is the price of MOQ100 pieces Ex-work Shenzhen ,not including the Tax and transportaion fee.And sample orders are acceptable,but the price is a little higher.
- 4.AC85-265V wide voltage is also available
- 5.Quality guarantee: the product warranty is 2 years
- 6.Normal Production period: 14 days after prepayment.

3、 Package and the physical light description :

Description:

- 1.Each carton with 5 layers ;
- 2.Each layer with 5 pieces ;
- 3.The middle with EPE foam seperated,to be quake proof ;
